

ABSTRACT OF THE DISCLOSURE

A ferrule connector assembly includes a housing having a bore therethrough. The housing has a first end adapted to receive a sleeve assembly having a split sleeve and core member disposed in the split sleeve. A second end of the housing receives a ferrule containing an optical fiber. The core member has a hole extending therethrough that is optically aligned with the optical fiber. The sleeve assembly is press-fit within the bore of the housing and secured within the housing through one or more securing structures.
